## Save money on your ERP Implementation

Eliminate unnecessary software costs

Eliminate implementation of unneeded functionality

Drive optimal business processes, not use of technology

---

### Workshop!

A Logan Consulting QAD expert will come to your site to review your ERP implementation thoughts and plan. We will help facilitate a frank discussion on how to most cost-effectively implement ERP at your organization.

## Have Logan Contact Me!

- Ensure your ERP implementation supports your business and business strategy
- Assess how your ERP plan addresses the 'classic' ERP goals – reducing inventory and working capital costs, improving sales service levels, optimizing pricing and margins.
- Optimize your return on investment
- Reduce unnecessary software and implementation costs
- Streamline and simplify business processes
- Mitigate risk
- Learn how to improve user satisfaction
- Align Executive goals to your ERP initiatives

### Workshop Agenda:

- We will review your ERP plan (ahead of workshop)
- We will prepare an outline and initial thoughts (ahead of workshop)
- Review and clarify the ERP plan
- Define appropriate scope & business cost savings and/or margin enhancement
- Identify appropriate software modules and pricing
- Identify appropriate functionality
- Discuss total cost to implement, total cost of ownership
- Cost benefit analysis
