Our Mission Statement:

The Rocky Mountain User Group provides support to one another in the implementation and utilization of MFG/PRO. The User Group meetings will be of an educational nature, as well as a means of communication with QAD Inc. on common issues of interest. We will work in association with the America's User Group as a 'Regional' User Group.

The Rocky Mountain User Group is not intended to be a profit making operation. All funds collected by the Group will be used to expand and improve the operation and services provided by the group.

Advantages of Being a Member:

- **NETWORKING** with other member companies who use QAD Enterprise Applications and have similar equipment and programs with which to compare and ask questions that may be relevant to your business.
- **EXPOSURE** to resources and contacts for gathering information to be able to resolve pending business decisions.
- **LEARNING** about other QAD Enterprise Application modules, third party products, and relevant manufacturing topics.
- **INVOLVEMENT** with making decisions as to what is important and necessary for future changes in QAD Enterprise Application programs.

Goals of the User Group are:

- To provide a network of knowledgeable individuals and companies familiar with QAD Enterprise Application. The differing business environments can provide a resource for learning and resolving problems of the member companies.
- To provide user members a meeting place where third party vendors and equipment vendors can show and discuss their products in relation to QAD Enterprise Application programs.
